**Existing:**  
**Finishes / Fixtures / Filaments:**  
 Existing "Sommerfield" finishes, fixtures and filaments to be stripped-out back to building shell and defects identified in the Walls Group condition survey made good, including pointing to blockwork, penetrating damp, fire-stopping and water staining.  
**Internal Walls:**  
 Internal walls (existing & proposed) to perimeter of sales area to be lined with 12mm lamirite Maple board. Walls to warehouse and amenity area to be lined with plasterboard.  
**Floor:**  
 Standard Aldi floor tiles throughout on adhesive bed over self-levelling screed. Newer material to be installed at entrance doors. Recess (200mm) to be formed in structural floor slab to accommodate freezer in warehouse area.  
**Ceiling:**  
 Existing redundant ceiling system removed and new Rockfon Dextor regular 600 x 600 mm suspended ceiling throughout sales area and amenity areas. No ceiling in warehouse.  
**Mechanical Services:**  
 Existing redundant services to be stripped-out and new heating/ventilation system installed throughout, to standard Aldi specifications, to achieve 2 air-changes per hour in the sales, amenity and warehouse area and 8 air-changes per hour in the toilets and with a gas fired air heater capable of producing 2.5m<sup>3</sup>/h @ 38 Degrees C.  
**Electrical Services:**  
 Existing redundant services to be stripped-out and new electrical services system installed throughout to Aldi standard specification including general lighting and power, emergency lighting to BS 5266, fire alarm system to BS 5836: Part 1 and a security alarm system.  
**Plumbing & Drainage Services:**  
 Existing redundant internal plumbing and drainage services and all sanitary fittings to be stripped-out and new plumbing, drainage and sanitary fittings installed throughout to Aldi standard specifications.

Existing Entrance / Exit

## 77 CAR PARKING SPACES

- North Boundary Wall:**
- Mortar pointing to concrete copes is missing at the exit gate. Re-point.
  - Defective render at northeast corner of car park. Repair render.
  - Missing brickwork at northeast corner. Renew brickwork.
  - Re-align concrete copes where necessary.

Surface in north car park in good condition, re-paint white lining only.

Remove existing trolley bay.

Re-paint directional signage, parking bay divisions, disabled, and parent child spaces on car park surface.

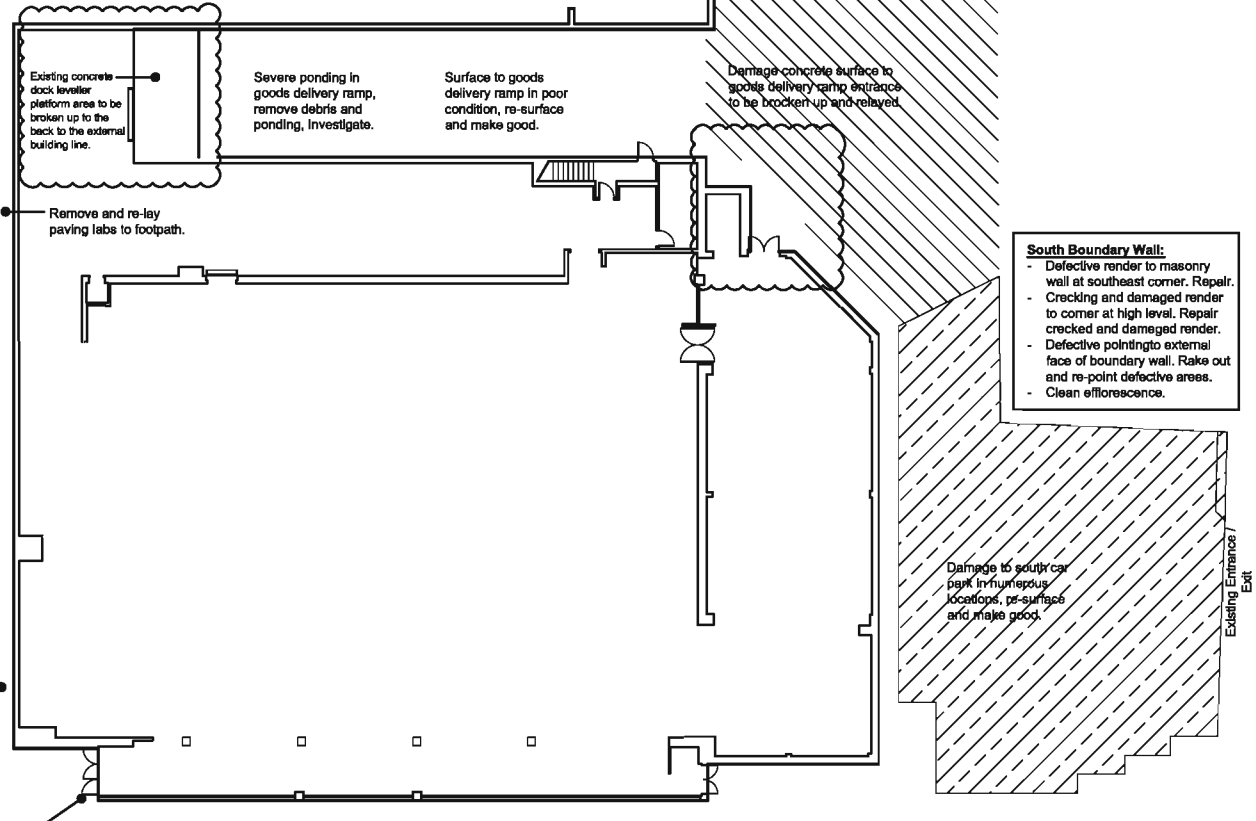

Remove and relocate existing meter housing.

Remove existing trolley bay.

Remove all existing bollards on site.

Remove existing guardrails at existing entrance and exit doors.

Cracked paving slabs, replace with Aldi conservation paving.

- South Boundary Wall:**
- Defective render to masonry wall at southeast corner. Repair.
  - Cracking and damaged render to corner at high level. Repair cracked and damaged render.
  - Defective pointing to external face of boundary wall. Rake out and re-point defective areas.
  - Clean efflorescence.

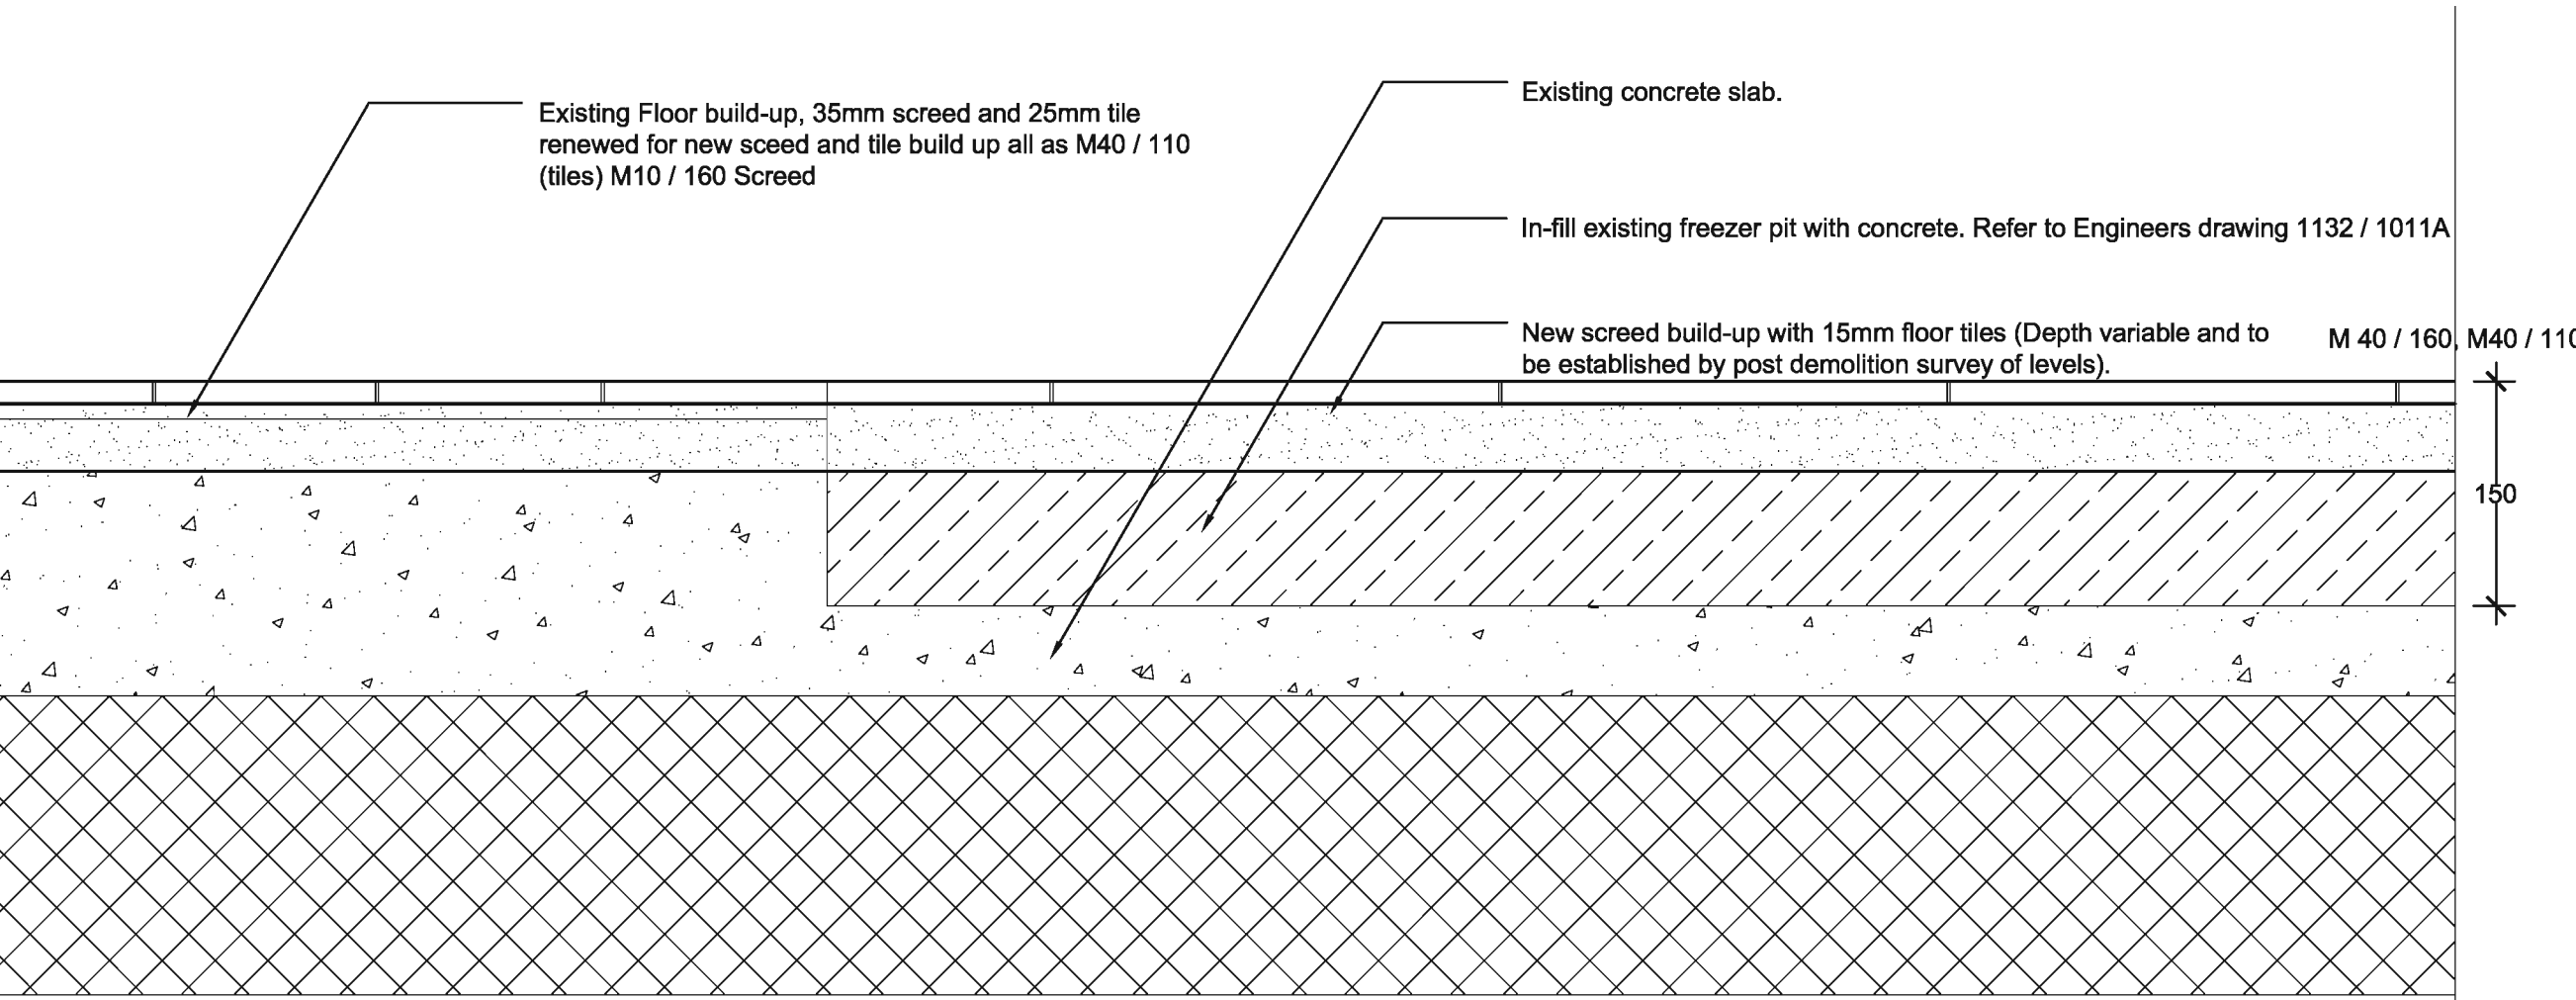

Remove existing signage.

Demolish north end of South boundary wall. Patch back as required and prepare South boundary wall for over-render.

Notes

Project No. 06109 Drawing No. (58)002 Rev. A

Where automatic sliding doors are provided with a mechanical hold open to assist the escape from any position in the event of smoke rapidly filling and obscuring the means of escape, the door should be capable of being opened from any position.

**FIRE SERVICE RECOMMENDATIONS**

**EMERGENCY LIGHTING:**  
A non-maintained emergency lighting system of not less than one hours duration, complying with BS 5268:Part 1: 1999 (Type NM1) & BS EN 1838: 1999 (or BS 5266 - 7: 1999) is required to these premises. The system should be capable of effectively illuminating all exit routes, public areas and any other areas as specified by the Fire Authority.

**FIRE WARNING SYSTEMS:**  
Effective means of giving warning in case of fire shall be provided throughout the premises. In this instance a manually operated electrical fire warning system, complying with BS 5839: Part 1: 2002, with an adequate number of break glass operating points and sounding devices shall be installed. The system should provide a minimum sound intensity of 65db(A) or 5db(A) above background noise levels with sounders positioned to ensure it is audible throughout the area.

**MEANS OF ESCAPE:**  
All fire exit doors which afford a fire exit from the premises shall not, during all periods of occupancy, be locked or fastened in such a manner that they cannot be easily and immediately opened from the inside without the use of keys. The means of securing all fire exits shall be by a device acceptable to the Fire Authority with operation clearly marked and indicated by a notice complying with BS 5499: Part 1: 1990 on the outside of the door.

**FIRE FIGHTING EQUIPMENT:**  
The undomated fire fighting equipment should be provided as a minimum and be sited as follows:  
1 x 9 litre water/gas extinguisher at or near final exits.  
1 x 9 litre water/gas extinguisher at all fire exits  
1 x 2.5 kg Co2 extinguisher for all electrical risks.

**EXIT SIGNS:**  
Where the direction to a means of escape from the premises is not apparent, intermediate signs incorporating pictograms and directional arrows shall be provided to comply with the Health and Safety (Safety Signs and Signals) Regulations 1996 and/or BS 5499: Part 1: 2002

THIS DRAWING TO BE READ IN CONJUNCTION WITH WSP DRAWINGS

Project No. 06109 Drawing No. (68)002 A Rev.

**EMERGENCY LIGHTING:**  
 A non-maintained emergency lighting system of not less than one hours duration, complying with BS 5266:Part 1: 1999 (Type NM1) & BS EN 1838: 1999 (or BS 5266 - 7: 1999) is required to these premises. The system should be capable of effectively illuminating all exit routes, public areas and any other areas as specified by the Fire Authority.

**FIRE WARNING SYSTEMS:**  
 Effective means of giving warning in case of fire shall be provided throughout the premises. In this instance a manually operated electrical fire warning system, complying with BS 5839: Part 1: 2002, with an adequate number of break glass operating points and sounding devices shall be installed. The system should provide a minimum sound intensity of 85db(A) or 5db(A) above background noise levels with sounders positioned to ensure it is audible throughout the area.

**MEANS OF ESCAPE:**  
 All fire exit doors which afford a fire exit from the premises shall not, during all periods of occupancy, be locked or fastened in such a manner that they cannot be easily and immediately opened from the inside without the use of keys. The means of securing all fire exits shall be by a device acceptable to the Fire Authority with operation clearly marked and indicated by a notice complying with BS 5499: Part 1: 1990 on the outside of the door.

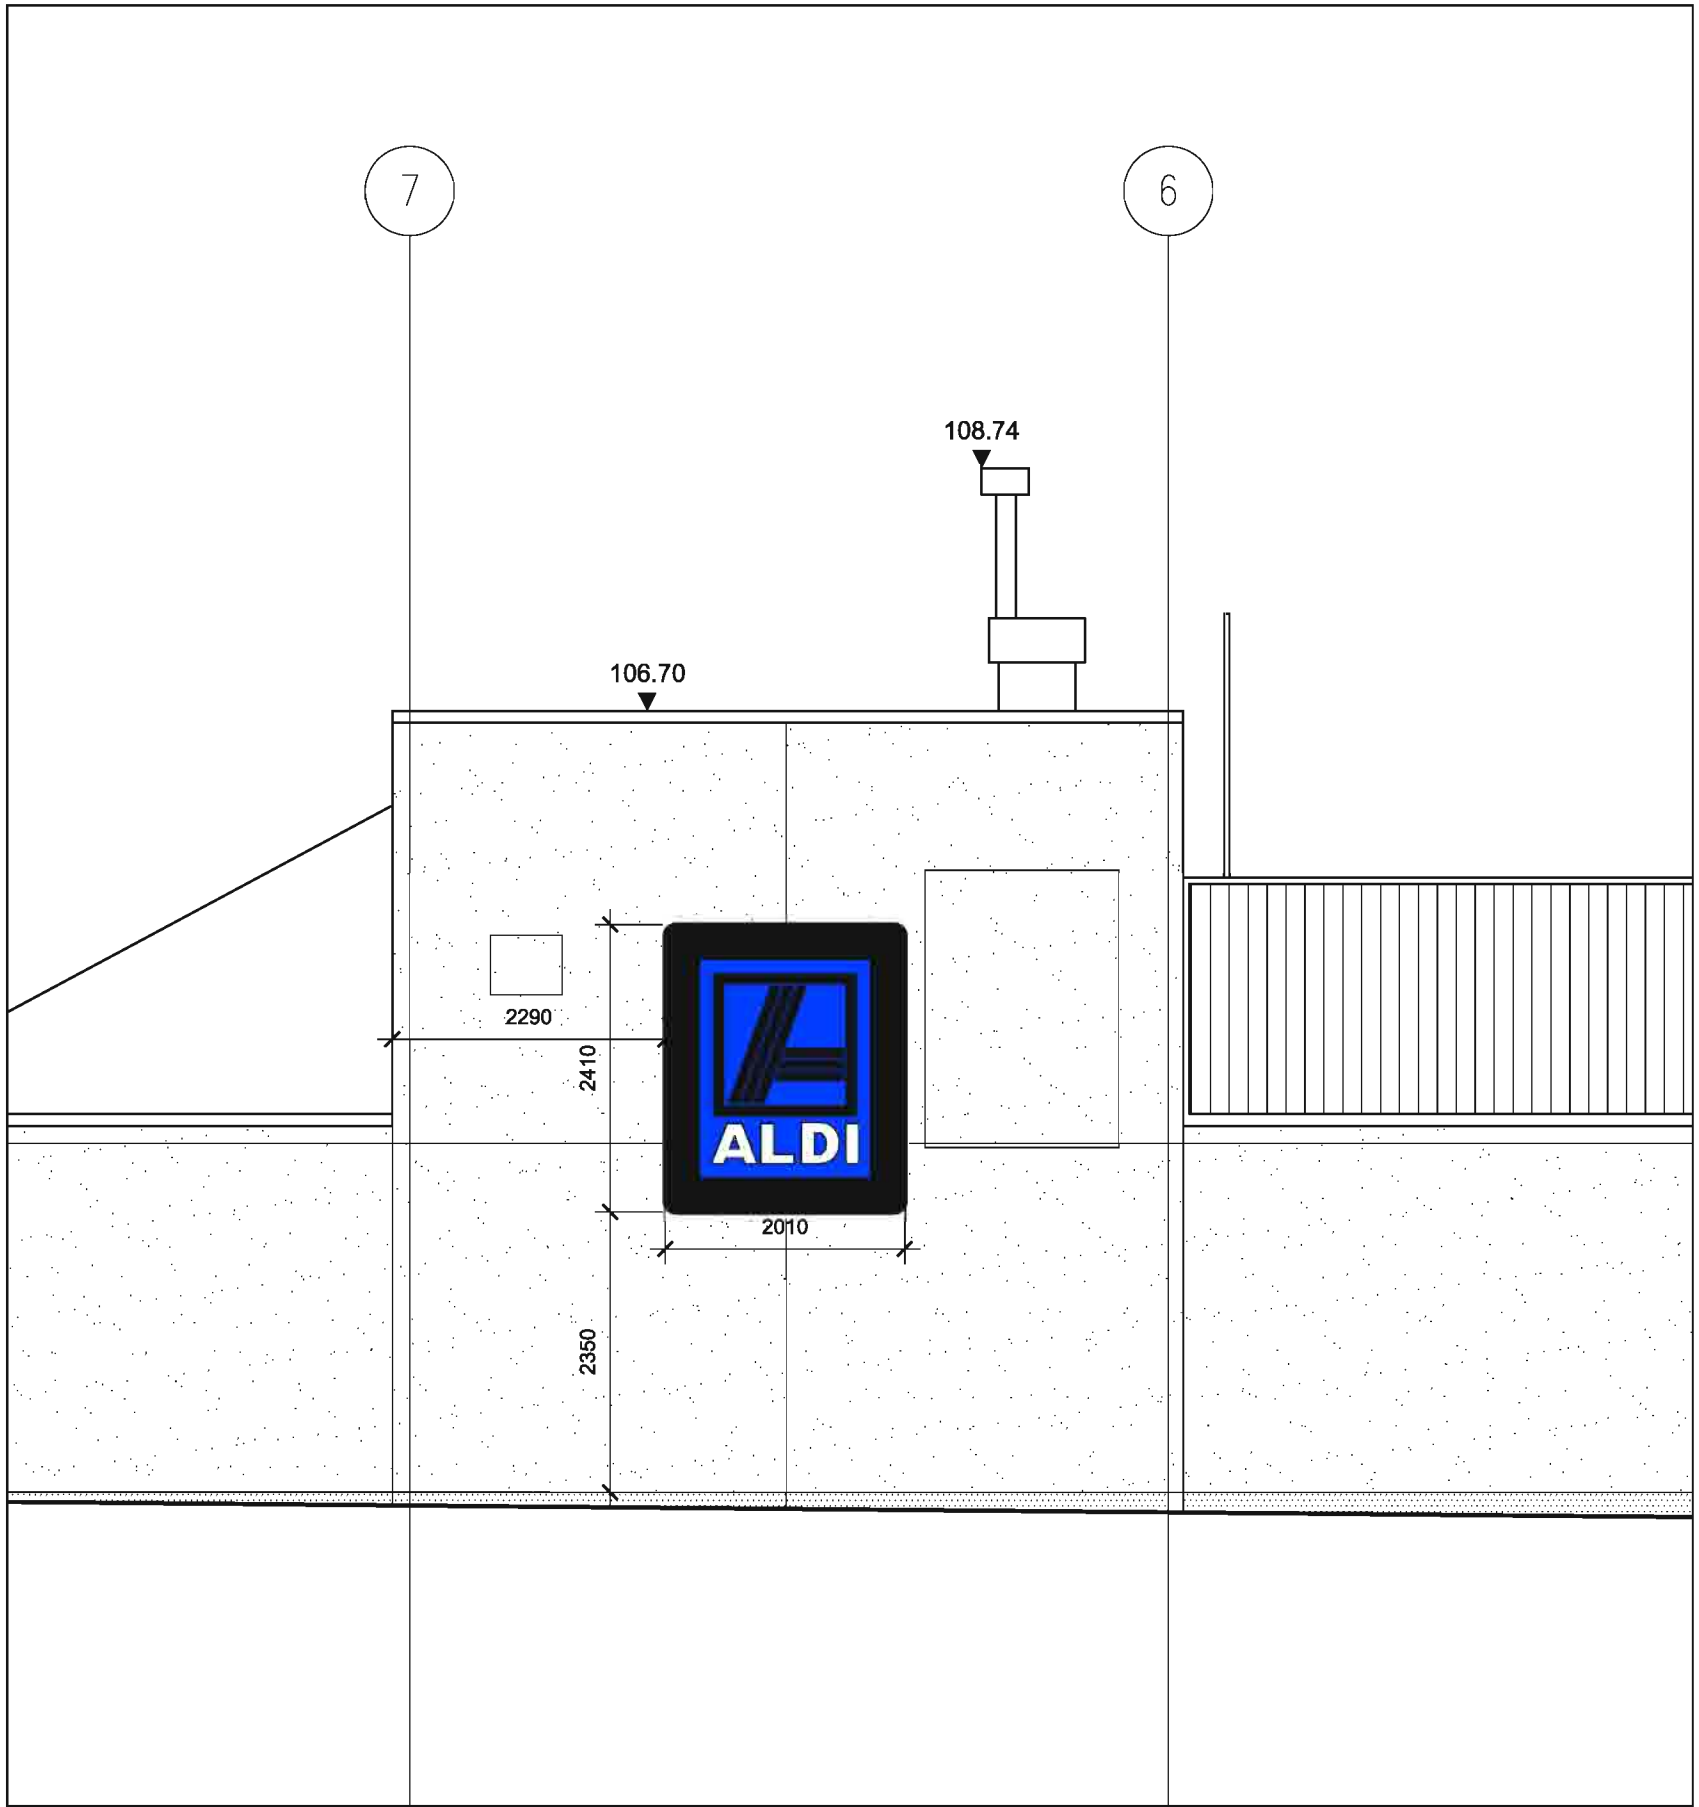

**FIRE FIGHTING EQUIPMENT:**  
 The undemoted fire fighting equipment should be provided as a minimum and be sited as follows:  
 1 x 9 litre water/gas extinguisher at or near final exits.  
 1 x 9 litre water/gas extinguisher at all fire exits  
 1 x 2.5 kg Co2 extinguisher for all electrical risks.

**SIGNAGE:**  
 Where the provision of a means of escape from the premises is not apparent intermediate signs, incorporating pictograms and directional arrows shall be provided to comply with the Health and Safety (Safety Signs and Signals) Regulations 1996 and/or BS 5499: Part 1: 2002
